

The Hazards Forum,

Oxford Hazards Forum series

Bringing researchers together to reduce the impact of hazards on society

The Economics of Hazards

Sponsored by the SPIDER network these FREE lunchtime workshops provide talks on hazards subjects, practical research skills and networking across the university and beyond

All welcome to this FREE lunch time workshop !

Starting at 12:30 on 30th April

At the Department of Earth Sciences, South Parks Road

4 short talks

Dr Matthew Owen "Lost production from North Sea Oil and Gas infrastructure as a consequence of a 10,000 year extreme water level event"

University College London

Scott Thacker 'Cost/Benefit Analysis of Infrastructure in the UK' *ECI, Geography Oxford*

Dr Patrick McSharry 'Quantifying the economic costs of natural disasters using physical and statistical models: a study of hurricanes making landfall in the US' *Smith School, Oxford*

Prof Scott McDonald 'Climate Change and Malaria in Ethiopia: Changing Economic Incentives' *Oxford Brookes University*

This interdisciplinary forum for collaboration in social and physical hazards and disasters research aims to:

- Encourage cross university collaborations
- Reduce the impact of hazards on society through practical interdisciplinary research

**For a FREE lunch please register your interest with Troy or Jackie,
