

# LIVING ON A VOLATILE EARTH

11th June, 2018 | Gilbert Room  
School of Geography and the Environment  
Registration | 10am

This day-long workshop will explore how geographers are approaching human-environment relations in which the human body is interconnected and entangled with various 'volatile' agencies, including: geology, atmospheric phenomena, landscapes and animals.

## Speakers include:

Nigel Clark and Alexandra Gormally, University of Lancaster, Supercritical Powers: Meeting with Magma at the Krafla Caldera

Edda R.H. Waage, University of Iceland- Volatile relations in energy landscapes

Karl Benediktsson, University of Iceland- Fixing a volatile planet? The socio-material assemblages of energy

Katrín Anna Lund, University of Iceland- Journey into the dark: Encountering Aurora Borealis

Gunnthóra Olafsdóttir, University of Iceland- The benefits of interdisciplinary research: the case of nature restoration and the human stress-response
